Grace Victoria Pennington
Talent Acquisition at Cedar Inc.
New York, NY 10014

Dear Ms. Grace Victoria Pennington:

At my previous job I worked with a team to build an APP that improved the relationship between the clients and the institution, creating a new way for customers to interact with their home loan contracts and giving them the freedom to manage their contracts directly over their cell phones. I think Cedar is doing the same, improving lives and costumers' experiences trying to build a new approach to healthcare. Finding new solutions for old methods and trying to improve customer interactions with a product, combined with the chance to learn new things is what drives me. For these reasons, I would be delighted to be considered for the **Insights Analyst** role at Cedar.

Although my previous roles were in the banking industry, acquired skills like critical thinking, organization, teamwork, and leadership are transferable to any role. I am an astute problem-solver capable of prioritizing and managing complex projects.

Throughout my career, I have been recognized for achieving the highest expectations and satisfaction ratings while solving challenges in a timely manner. While I enjoy working with data and creating dashboards, I equally enjoy learning new skills and finding solution to different problems.

Below is an analysis of a few requirements that match my background:

You Want:

- An analytical mindset and passion for finding opportunities and insights within data
- Demonstrates a passion for breaking down and understanding complex systems
- Strong organizational, time management, and presentation skills

I Bring:

- In my last role, I was responsible for analyzing, producing and presenting technical studies to propose improvement of existing products and services and development of new ones.
- As a senior consultant my job was to thoroughly understand the systems and all their modules, responsible for managing a portfolio of over \$80 billion with over 7 million contracts.
- As Product Owner of a project, working with a team on a tight delivery schedule while keeping project stakeholders up to date. I developed these skills and we were able to deliver an excellent product.

I am excited about the chance to work at Cedar and would appreciate the opportunity to discuss my experience and value that I can offer you as your next **Insights Analyst**. Thank you for your time and consideration.

Sincerely,

Joao Costa
