Dear Hiring person at EDO:

At my previous job I worked with a team to build an APP that improved the relationship between the clients and the institution, creating a new way for customers to interact with their home loan contracts and giving them the freedom to manage their contract directly on cell phones. Finding new solutions for old methods and trying to improve customer interactions with a product, combined with the chance to learn new things are some of the things that drives me. For these reasons, I would be delighted to be considered for the **Data Analyst** role at EDO.

Although my previous roles were in the banking industry, acquired skills like critical thinking, organization, teamwork, and leadership are transferable to any role. I am an astute problem-solver capable of prioritizing and managing complex projects.

Throughout my career, I have been recognized for achieving the highest expectations and satisfaction ratings while solving challenges in a timely manner. While I enjoy working with data and creating dashboards, I equally enjoy learning new skills and finding solution to different problems.

I am excited about the chance to work at EDO and would appreciate the opportunity to discuss my experience and value that I can offer you as your next **Data Analyst**. Thank you for your time and consideration.

Sincerely,

Joao Costa
